

Overview

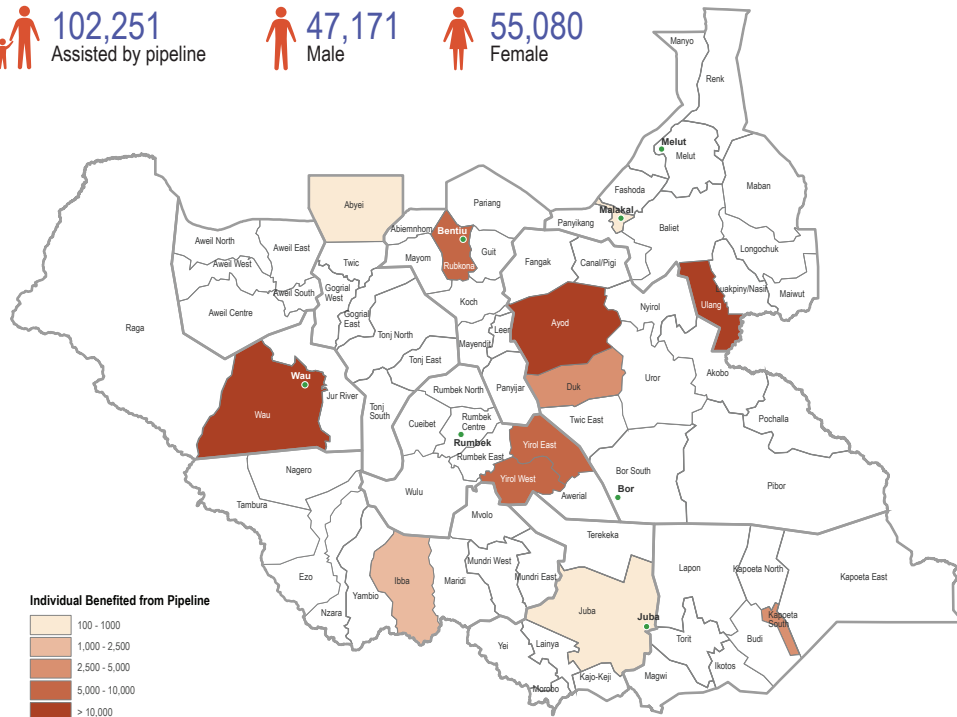

The International Organization for Migration (IOM) manages the common pipeline for the Shelter and NFI Cluster by procuring, transporting and storing stocks throughout South Sudan. Supplies are accessible to Cluster partners ensuring sectorial coverage of the current and future needs more efficiently.

As the Cluster lead agency, IOM has signed a Memorandum of Understanding (MoU) with all partners interested in accessing the pipeline. The MoU sets minimum standards in terms of managing warehouses, handling supplies and providing IOM with necessary information in order to ensure effective pipeline management. Partners are responsible for submission of assessment, distribution and PDM reports to capture the needs and beneficiary feedback to the pipeline to improve the future response.

Key Figures, 2018

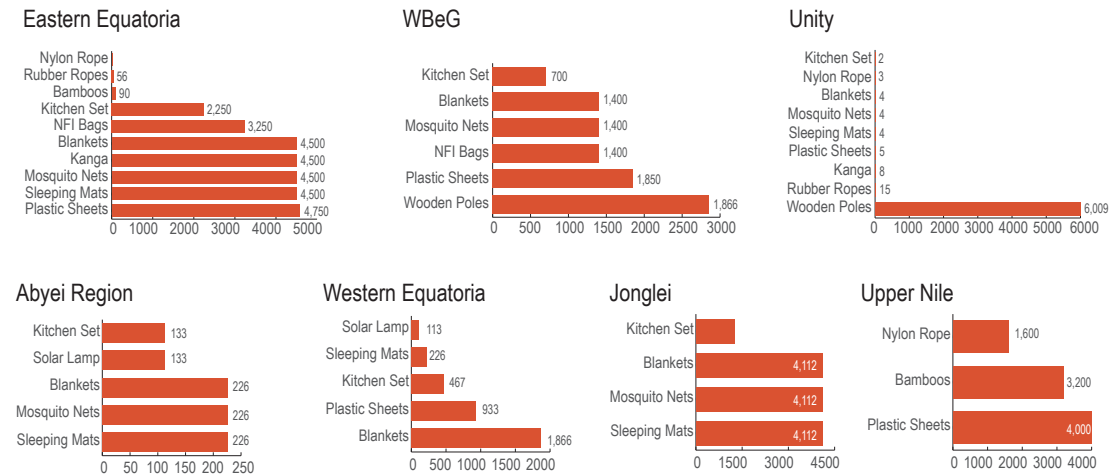

Individuals Served with NFI and Shelter Materials from Pipeline

Items Released in the Last Month

Total value of the items released in the last month **USD 0.37 Million***
