Procuring organization and warehouse from which stock was sourced

IOM , Bor warehouse

Quantity of each item distributed per household
- specify variations by household size

Items	Quantity	Total
Plastic Sheets	1 Pc	1
Mosquito Nets	1Pc	1
Rubber Ropes	1 role	1
Kanga	1 Pc	1
Kitchen set	1 pc	1
Total Items per HH		5 Items

Total quantity of each item distributed in the response

Items	Package/Unit	Quantity	Total
Plastic Sheet	Bales	161*5	805 Pcs
Mosquito Nets	Mosquito	16.25*50	805 pcs
Rubber Ropes	Bales	28*30	805 pcs
Kanga	Bales	16.25*50	805 pcs
Kitchen set	boxes	100.3*8	805 pcs

If the quantity of the distributed items is different with what was requested, please explain here.
 The items requested and distributed remain the same.

Type of Item	Originating Items	Style/Version #	Size	Colour	Other
1. Plastic Sheets	IOM	N/A	6X4M	White/grey	Pipeline Standard
2. Kanga	IOM	N/A	6X4M	Multiple	Pipeline Standard
3. Mosquito Nets	IOM	N/A	190L*180W*150H	White/Blue	Pipeline Standard
4. Kitchen Set	IOM	N/A		Grey	Pipeline Standard
5. Rubber Rope	IOM	N/A		Black	Pipeline standard

Summary of Distribution

- Where was the distribution held and how was it organized?
- What and how were beneficiaries informed?
- How was equal access ensured for men, women, girls and boys?
- How was order maintained during the distribution?
- How was APP mainstreaming activities implemented during the distribution (please refer to the distribution checklist)

The distributions took place in Lil **Pariak and Jerwong-Malualchat** Centers, in Kolnyang Payam of Bor South – Bor County Jonglei State. This distribution came as a result of need analysis carried out by NFIs and Protection partners ACTED between late December 2019 and early Feb 2020 with effective participation of **ADA** and **PAH** team. The targeted population of **805 households** which 65% of its members were inter-communal conflict affected residents of Pariak in 2017 and 35% were flood affected residents of Jerwong- Malualchaat.

The distribution was coordinated and organized by ADA and PAH through close coordination with the local authority and RRC who was responsible for the coordination on Humanitarian affairs in the area and also as a bridge between the Community and the Humanitarian agencies.

Beneficiaries who were verified and had met the SNFIs Cluster targeting criteria for NFIs eligibility were issued tokens during registration. Before the distribution took place ADA and PAH hired community Mobilizers who went out to inform the beneficiaries about the locations and the centers and the date of distribution using Megaphone for two full days prior to the actual date of distribution. All the registered inter-communal conflict; Flood affected persons and the most vulnerable hosts community living there were issued with the tokens during registration/verification were mobilized to come for the distribution in Pariak and Jerwong-Malualchat Centers based on the Schedules made for the 2 Bomas, The team also ensured that Protection mainstreaming in the sense that for the registered Elderly Persons, PLW, Child headed households and PSNs were given the first priority to receive the Items, while those who could not make it to the distribution site were advised to send in able youths and other relatives with the tokens to collect the items on their behalf.

Crowd controllers and other hired casual labors exerted their effort to make sure, beneficiaries whose tokens and names had been cross checked and endorsed by the enumerators are the ones to receive the items. Protection cases were in the top priority of ADA and PAH during the whole process. PAH Staffs ensured that protection cases were put into consideration during the distributions. All casual workers hired were well oriented about their tasks by the team to ensure that every person of concern is well served. Aged and physically mental persons were identified from the queues and given priority including psychosocial support.

Attached to the above also two women were hired to carry water to beneficiaries for both washing hands and drinking, PAH provided hand washing facilities including soaps to all the two distribution centers where beneficiaries had to wash their hands before standing in the line and also they were trained on the COVID information covering in causes, signs and symptoms and preventive measures and Beneficiaries has to maintain one meter from each other while standing on the line as waiting to receive.

The team also set up a Complain desk to handle complains and compliments in a proactive manner managed by the RRC

personnel and pass out key messages including messages on Corona virus risk mitigation and prevention strategies including enhancing understanding of the locals on this new disease, besides demonstration on the effective use of the distributed items such as how to use mosquito net, Kanga, Kitchen set and other categories of the items.

What actors were involved in the decision-making regarding the distribution process?

-Explain what role the following people had in the process: local authorities, partners, humanitarian officers, volunteers, beneficiaries, etc.

ADA and PAH team arranged the distribution process with the involvement of Local Authorities, RRC and hired casual laborers. This was done to ensure the planned distributions process take place in a successfully manner Without leaving any beneficiary unserved at the end of the distribution. Local authority gave special thanks and appreciation to the two organization who did intervention as they were in needs. Above all ACTED played a vital rale during beneficiaries verification and registration both in Lil and Jerwong and they allocated one hard top land cruiser adding on the one provided by PAH to aid a solid logistical support to this intervention from the two locations

Changes from assessment recommendations

-If there were any changes to the original plan, please explain what changes occurred and why they were necessary. This including reason of difference of the number of HHs targeted and receiving the items, and actions taken if there are remaining items after the distribution.

As based on the assessment report conducted by ACTED, the intervention was entirely planned for Pariak in Lil IDP camp only but on the desk review stages by the both partners that includes ACTED, PAH and ADA, the RRC coordinator for Bor south stressed up a major concern for the dare need for the people of Jerwong who were cut out from any services as their houses holds were affected by the flood so that partners agreed to include the Jarweng HHs although they were very small in number.

The needs remained the same and it has not change while the items recommended were also in accordance to the need although they were very few especially the mosquito nets could have been recommended 2pcs per HH but only 1pc was recommended yet mosquitos have increased and also many households are large households ranging from 7 members on and above

Targeting criteria

-Who finally received and why? Did the group to be targeted change in any way between the initial assessment and those who received on distribution day?

ADA and PAH followed the Cluster standard targeting criteria during the time of need analysis and verifications/ registrations. Team ensured that, the targeted and the registered beneficiaries were the ones in possession of the tokens and their names are verified by hired enumerators. ADA and PAH team made it clear during verification /registration that, whoever shall possess two tokens by any fraudulent means will not be served this was to mitigate the incidences of duplication. Beneficiary will be allowed to carry two tokens to distribution Centre or have two similar names only if Such names are subject to verification by the Team with help from the chief of that location, Block/Boma.

By putting such measures in place and widely announced by the community mobilizers, the distributions went on well very smoothly. The coming of Beneficiaries with individual's tokens made it much easier for verification team to solve the issues of complains arising from the beneficiaries at the set Complains and Response/feedback desk.

All registered persons received the items equally with minimal complaints. Some of the beneficiaries who lost their tokens were later on solved by verifying their names from the existing beneficiaries' distribution lists of locations or Bomas where they were registered from the correct order of the three names mentioned in our distribution lists/sheets. Through this process, all the complaints of the lost tokens were all solved and everyone was served to their satisfaction.

Challenges and lessons learned

-Did you face any major challenges, and/or learn any useful lessons?

The challenges faced by team during exercises are as follows:

- Recruitment of the enumerators was first difficult because they were at first refusing the term of payment as per cluster rate hence limiting the partner's recruitment though it was solved.
- Some beneficiaries were most vulnerable to walk and therefore, it delays the distribution to finish in time such beneficiaries were having no caretakers to come along with their token.
- Delay of the items to be facilitated to the location on time due to this covid 19 which at first affected the operation of the IOM staffs due to lockdown.
- Translation was a problem on one side as PAH Staff was need translator due to limited partners on the ground because most of staffs were on their leave holiday.

Lessons Learned:

- We learned that some of the beneficiaries were fishermen as Jerwong is on the River Nile bank.
- It was observed that girls could wear the kangas only as a way of differentiating them with married women hence making the kangas more useful to girls than women.
- The community respects their chiefs and other community members more than any other member of the society.
- Women can perform better than men in the duties assigned to them as observed during the distribution.
- The COVID 19 integration to the responses delays the distribution programming since beneficiaries have to move one after the other and also time consuming while passing the COVID 19 messages.

Safety Audit:

ADA and PAH team conducted safety audit in regards to accessibility of the selected distribution site by the beneficiaries. The selected site was agreed upon by beneficiaries, local leaders as they deemed safe for the people to travel to the distribution site. The team did site walk to the distribution ahead of one day to check on any hazardous objects and site cleaning was done. The distribution was conducted in central point closed to the water point, sanitation facility and under shade. Drinking water was providing through hiring water carrier. Site clearance was done prior and after distribution of the items

Recommended next steps

-Should any further action be taken in the area by the Shelter and NFI Cluster, or other actors?

- There is need for more response in Pariak and Jerwong- Malualchaat Kolnyang Payam, Bor South County, as **some** Bomas were left out during need analysis done by ACTED, and therefore, some needs cases were reported during the response in Pariak and Jerwong-Malualchat Bomas.
- There is need for more shelter construction to the most vulnerable people in Lil although ACTED have managed to construct shelters for 30 HHs only which is not enough.
- Further need for protection intervention incorporating in GBV issues, HIV, COVID 19 awareness generally in Bor south because people are not aware of how to manage their health issues/status.
- The WASH gaps are evident on ground, seen from poor sanitation and hygiene as there were no many WASH partners operating on the ground especially in Lil there is need to construct community Toilet at the community centre built by ACTED.

Anecdotes, Stories, Photos

-Please share any interesting or illustrative stories of people's experiences, responses, and needs; and photos
