Summary of Distribution					
<ul style="list-style-type: none"> - Where was the distribution held and how was it organised? -What and how were beneficiaries informed? - How was equal access ensured for men, women, girls and boys? - How was order maintained during the distribution? 					
<p>The continued and sustained upsurge in armed violence across the west bank from Jan – April 2017 results in the influx of IDPs from different locations towards Aburoc. Beginning of May ICRC and South Sudanese Red Cross assessed the need and conducted shelter and &NFI distribution to 4280 households. DRC and WVI carried a verification mission and gave out tokens to 2515 new arrivals families with no shelter and not covered by the earlier distribution.</p>					
<p>The distribution took place in the open field next to WVI compound where the items were initially stored. Spaces</p>					

were demarcated for concentration/crowd point, waiting area, token collection and signature place, distribution, compliant desk and entry and exit points. Each day beneficiaries were briefed before the start of the distribution. WVI & DRC mobilized staffs and volunteers for the arrangement of the distribution and crowd control. The distribution was carried for a period of two days (06 -07/06/2017). On the first day Block 3, Block 4 and Block 5 beneficiaries were served and on the second day Block 1 and Block 2.

Initial sensitization meeting held with the ROSS office highlighting the plan of the distribution and to ensure military interference is avoided at all time. A meeting was also held with the community leaders to ensure proper communication with communities. Community level sensitizations were carried 2 days ahead of distribution; sensitization messages on the process of distribution, including distribution location, item entitlement, compliance mechanism and other distribution procedures were addressed with CCCM community mobilizers using the megaphone and also in the distribution location prior to distribution.

Token was given to each beneficiary to ensure entitlement. Those with tokens were allowed to go to the distribution site. Before starting the distribution separate queuing lines were arranged for Women, Men, PSN, and Minors; Protection team of DRC and NP supported on the identification of the PSN and Minors to be given priority in the distribution. Five tables were arranged where beneficiaries present and sign the tokens. The aim was to speed up distribution and reduce the queuing time of beneficiaries.

What actors were involved in the decision-making regarding the distribution process?
-Explain what role the following people had in the process: local authorities, partners, humanitarian officers, volunteers, beneficiaries, etc.

All key stakeholders were involved at various levels to ensure the smooth distribution of the shelter materials. The shelter and NFI partners announced the plan of distribution in the inter-agency coordination meeting in Aburoc (05/06/2017), DRC & WVI also asked other partners for any planned distribution or registration to avoid overlap on the distribution day, the ROSS office was consulted on the distribution plan (03/06/2017), meeting was held with community leaders concerning the distribution and information dissemination (04/06/2017), DRC - CCCM was consulted on the information dissemination mechanism and protection actors were also involved in assisting PSNs and Minors and address any protection concerns that arises during the distribution. DRC – CCCM established CRM desk to address any complain during the two days of distribution. 21 volunteers and 6 supervisors from WVI and DRC were involved in crowd control and distribution.

Changes from assessment recommendations
-If there were any changes to the original plan, please explain what changes occurred and why they were necessary.

Fewer items were delivered. The shelter & NFI partners verified 2515 HHs for distribution however only 2285 Plastic sheeting and 1260 ropes were delivered hence distribution adjusted to the number of delivered items (i.e: 230 Plastic sheeting and 1255 rope to be delivered).

Targeting criteria
-Who finally received and why? Did the group to be targeted change in any way between the initial assessment and those who received on distribution day?

New arrivals and other IDPs with no shelter were verified and issued with the token (Exercise took place on the 19-20th May 2017). Those who have tokens were the one who received the items. However, new arrivals came in after the verification mission completed has raised the concern of not being registered through CRM desk.

Challenges and lessons learned
-Did you face any major challenges, and/or learn any useful lessons?

- Many tokens were issued by different partners including S/NFI at different stage hence the mobilization campaign by the partners prior to distribution were also to include sessions on the identification of tokens.
- Deliveries of the items to the ground were delayed by two weeks from the initially agreed period and this has created a concern from the community that the distribution might not take place.
- Fewer items were delivered and some beneficiaries left out.
- New arrivals came in after the verification mission completed has raised the concern of not being registered through CRM desk. Future distribution to consider some contingencies to address issues comes out through CRM desk.

Recommended next steps

-Should any further action be taken in the area by the Shelter and NFI Cluster, or other actors?

- Timely delivery of items once the request has been made by the S/NFI actors.
- Cluster to deliver the remaining items so that the partners complete the distribution ASAP.
- Shelter partner to further assess the shelter situation IDPs in the current rainy season and recommend the way forward.

Anecdotes, Stories, Photos

-Please share any interesting or illustrative stories of people's experiences, responses, and needs; and photos

Please submit to IOM Juba (cc your Shelter and NFI Cluster State Focal Point)

Thank you!
